

## SKILLS

---

### Software Engineer

- **Enterprise Web Application Development** - Java, Spring Boot
- **Data Engineering** - SQL, MySQL
- **Web Client Development** - JavaScript, React.js
- **Infrastructure** - Git, Docker, Kubernetes

## SUMMARY

---

- Software Engineer with 2+ years of experience specializing in full-stack development.
- Proficient in **React**, **RESTful APIs**, and **JavaScript** with a strong understanding of **Java**, **Spring Boot**, and **Docker** for containerized deployments.
- Experienced in building scalable and efficient applications, collaborating with cross-functional teams, and optimizing backend services.
- Passionate about learning new things daily and finding interesting ways to solve challenges.

## EXPERIENCE

---

### Jio Platforms Limited

Navi Mumbai, India

*SDE 1*

*Jan 2023*

- Developed and maintained a user management system handling 40M+ users, reducing onboarding time by 30% through optimized backend processes and UI enhancements.
- Designed and implemented React-based front-end interfaces for an intuitive user experience, improving the engagement and usability.
- Collaborated with cross-functional teams in an Agile environment, contributing to sprint planning, feature development, and system improvement.
- Developed RESTful APIs using Spring Boot for Customer Relationship Management (CRM) system, enabling efficient customer handling, and seamless integration with front-end services.
- Built reusable React components for dynamic forms, customer lists, and task management modules within the CRM dashboard.

## EDUCATION

---

### Sandip University

*B.Tech CSE : 8.84*

*2019-2022*

### NDMVP

*Diploma in Computer Science : 78.24%*

*2015-2019*

## PROJECTS

---

### Plastic Detection Model Using YOLOV5

- This project focuses on building a deep learning-based object detection system that identifies and localizes plastic waste in images using the **YOLOv5** (You Only Look Once v5) architecture.
- The aim is to support environmental monitoring and automated waste management systems by accurately detecting plastic items in diverse settings such as landfills, beaches, and urban areas.

### Pinterest Clone (SkyWalls)

- SkyWalls is a fully functional Pinterest-style image-sharing application that allows users to explore, upload, and save their favorite images.
- Designed with a clean and responsive UI using React, and powered by Sanity.io as the headless CMS backend, the platform offers seamless user experience for visual content discovery and organization.
